

Medication Competency Assessment – Quick Reference

■ *Frequency*

- All staff must complete competency assessment prior to administering medication
- Reassessment required annually (or as per organisation policy)
- Additional assessments after incidents or long absence
- New medicines or changes may trigger reassessment
- Supervision required until competency is confirmed

■ *Sign-Off Process*

- Assessment carried out by trained senior staff / nurse / assessor
- Includes theory (knowledge) and practical observation
- Use standard competency checklist or tool
- Staff must demonstrate safe administration practices
- Final sign-off documented with signatures and date

■ *Policy & Compliance*

- Follow organisational medication management policy
- Align with CQC / regulatory requirements
- Maintain records in staff training file
- Non-competent staff must not administer medication independently
- Ensure ongoing monitoring and refresher training

Stay compliant • Ensure safety • Follow organisational and regulatory guidance
